

## Magic Tips for Growing your Sunflowers

1. Plant in a pot of compost or outside around 1.5 cm deep.
2. If growing in a pot once the sunflower is approx. 15cm plant outside.
3. Water every day! Keep soil moist, feel with your finger. If it's dry, then it's time to water!
4. Put a cane next to the sunflower for support and gently tie the sunflower to it.
5. Remember that slugs love sunflowers, so be aware
6. Keep watching every day to check how much your sunflower has grown!
7. Once the sunflower is established feed with tomato food for best results.
8. Enjoy yourselves!
